Please be advised that the Department of Resources Recycling and Recovery (CalRecycle), acting as the solid waste Enforcement Agency (EA) for Santa Cruz County, has accepted an application package for a Solid Waste Facility Permit (SWFP) Modification for the Ben Lomond Transfer Station. This public notice was prepared pursuant to Title 27, California Code of Regulations (27 CCR), Section 21660.3.

Project Description

The Ben Lomond Transfer Station is an existing large volume transfer/processing facility operating under a full Solid Waste Facilities Permit issued on September 15, 2000. The application package for SWFP Modification is to update the findings, conditions, regulatory references, prohibitions, self-monitoring and incorporate the updated Transfer/Processing Report. There will be no changes to the permitted tonnage, hours, or acreage.

EA's Determination

On August 4, 2020, the EA accepted the application for a modified SWFP submitted by Santa Cruz County. The EA's preliminary determination is that the proposed changes are such that the SWFP does not need to include further restrictions, prohibitions, mitigations, terms, conditions or other measures to adequately protect public health, public safety, ensure compliance with state minimum standards or to protect the environment, pursuant to 27 CCR 21665.
